Computer Science Teacher

St. Joseph’s Collegiate Institute, an all-boys Lasallian Catholic high school in Buffalo, NY, announces an opening for the position of Computer Science Teacher to begin in September, 2019.

The successful candidate will be responsible for teaching both introductory and upper level Computer Science courses — inspiring younger students to develop the foundational skills needed to use technology effectively as a learner at St. Joe's, while challenging our older students to develop more advanced skills and principles in preparation for continued application in college and in their careers. The candidate will also work as part of our technology team to provide support and coaching to our teachers related to technology integration in their classrooms.

Candidate Profile:

The ideal candidate is engaged in experiences aligned with the mission of St. Joseph’s Collegiate Institute. Content expertise is expected, as is the desire and ability to teach students of diverse backgrounds on an individual level. Eagerness to contribute as a life-long learner as part of a true professional learning community is a must.

Appropriate certifications and degrees are required. A completed (or in-progress) master’s degree is preferable.

Role and Responsibilities:

In addition to classroom instruction, additional responsibilities may include proctoring assignments, chaperoning events, attending extracurricular programming, and taking a leadership role as a model for the students, and as a member of our professional community.

The Computer Science Teacher reports to the Principal and will work together with students, faculty, and administrators.

Contact Information:

To apply, please send a letter of introduction and resume to St. Joe’s Administrative Assistant Mrs. Laura Seiferth at lseiferth@sjci.com. We will be accepting applications until the position is filled.
